

# PEB-Series

- self-adjusting, compact crimping tools for end sleeves with large working area from 0.14 - 16 mm<sup>2</sup>

PEB0116S

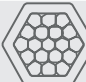

PEB0116H

Elpress is launching a new series of crimping tools for end sleeves. The tools have a compact, self-adjusting mechanism for crimping the end sleeves within the range from 0.14 to 16 mm<sup>2</sup>. The tool is available in two crimping geometries, regular square crimping and the new hexagonal crimping, which is optimized for confined applications.

#### Characteristics:

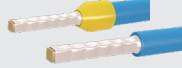

- small and compact, ideal for confined spaces
- lock function which only releases after crimping is complete
- well balanced so the tool does not slip out of your hand
- high-friction grip provides the ability to use the tool with a table as a support
- hole for attaching a safety strap
- ergonomically designed handle made of grip friendly material
- low handle force is required when crimping larger areas
- emergency release if the crimping sequence has to be interrupted
- tested together with Elpress terminals
- delivered with certificate for quality assurance
- large working area from 0.14-16 mm<sup>2</sup>

Designation	Area	Crimp profile
PEB0116S	0.14-16.0 mm <sup>2</sup> /AWG 26-6	
PEB0116H	0.14-16.0 mm <sup>2</sup> /AWG 26-6
